Allowance

1. Claims 1-46 is allowed as per the decision from the board of patent appeals and interference (BAPI). See board's decision of January 26, 2006
2. The invention relates to a method for managing Radio Access Network (RAN) resources to service forward link packet data transmissions, the method comprising:
 - receiving a data packet from a packet data network, the data packet directed toward a Mobile Station (MS) serviced by the RAN and including a packet service quality level indicator;
 - mapping the packet service quality level indicator to a corresponding set of RAN resources;
 - attempting to allocate the corresponding set of RAN resources to service the transmission of the data packet to the MS;
 - upon a partial allocation of the corresponding set of RAN resources, responding to the packet data network indicating the partial allocation;

The combination of the primary reference Willars with the secondary reference Garner fail to teach the above underlined unique feature of the present invention. Therefore claims 1-46 is allowed.
